

WORKING PAPER

TASKER

1. PROJECT: 90107.

✓ 2. ENCRYPTED COORDINATES: 245843/205669.

3. BACKGROUND: The target consists of "activities" occurring in an area reflected in a copy of a photograph contained in a sealed envelope. (T-3)

4. ESSENTIAL ELEMENTS OF INFORMATION:

- a. Describe the nature of the activities.
- b. Describe the purpose of the activities.
- c. Describe the immediate surroundings of the target activities.

NOTE: SUBMIT CONCEPTUAL SKETCHES IN SUPPORT OF YOUR FINDINGS

WORKING PAPER

Project: ~~91007~~ 90107 ✓
Date: 910128
Time: 1414-1457

Monitor: None

SUMMARY OF INFORMATION:

TASKING: "Describe the nature and purpose of the activity at the target site, and describe the immediate surroundings of this activity."

1. SURROUNDINGS: The target area appears to be the inside of one of two similar buildings.

- a. Each building is long and large.
- b. One building appears to have a covered set of stairs going down into a lower (sub-ground) level.
- c. The particular structure I zeroed in on was very large inside, almost like a gymnasium or warehouse. (See Sketch 1)
 - 1) It was well ventilated with outside air from windows which were positioned high on side walls. The end walls appeared to have no windows, and appeared to be made of wood.
 - 2) There are unidentified "things" hanging from the ceiling. These remind me of ceiling fans, or of electrical cords hanging down.
 - 3) Both large and small objects are positioned around the floor of this large area for being worked on.

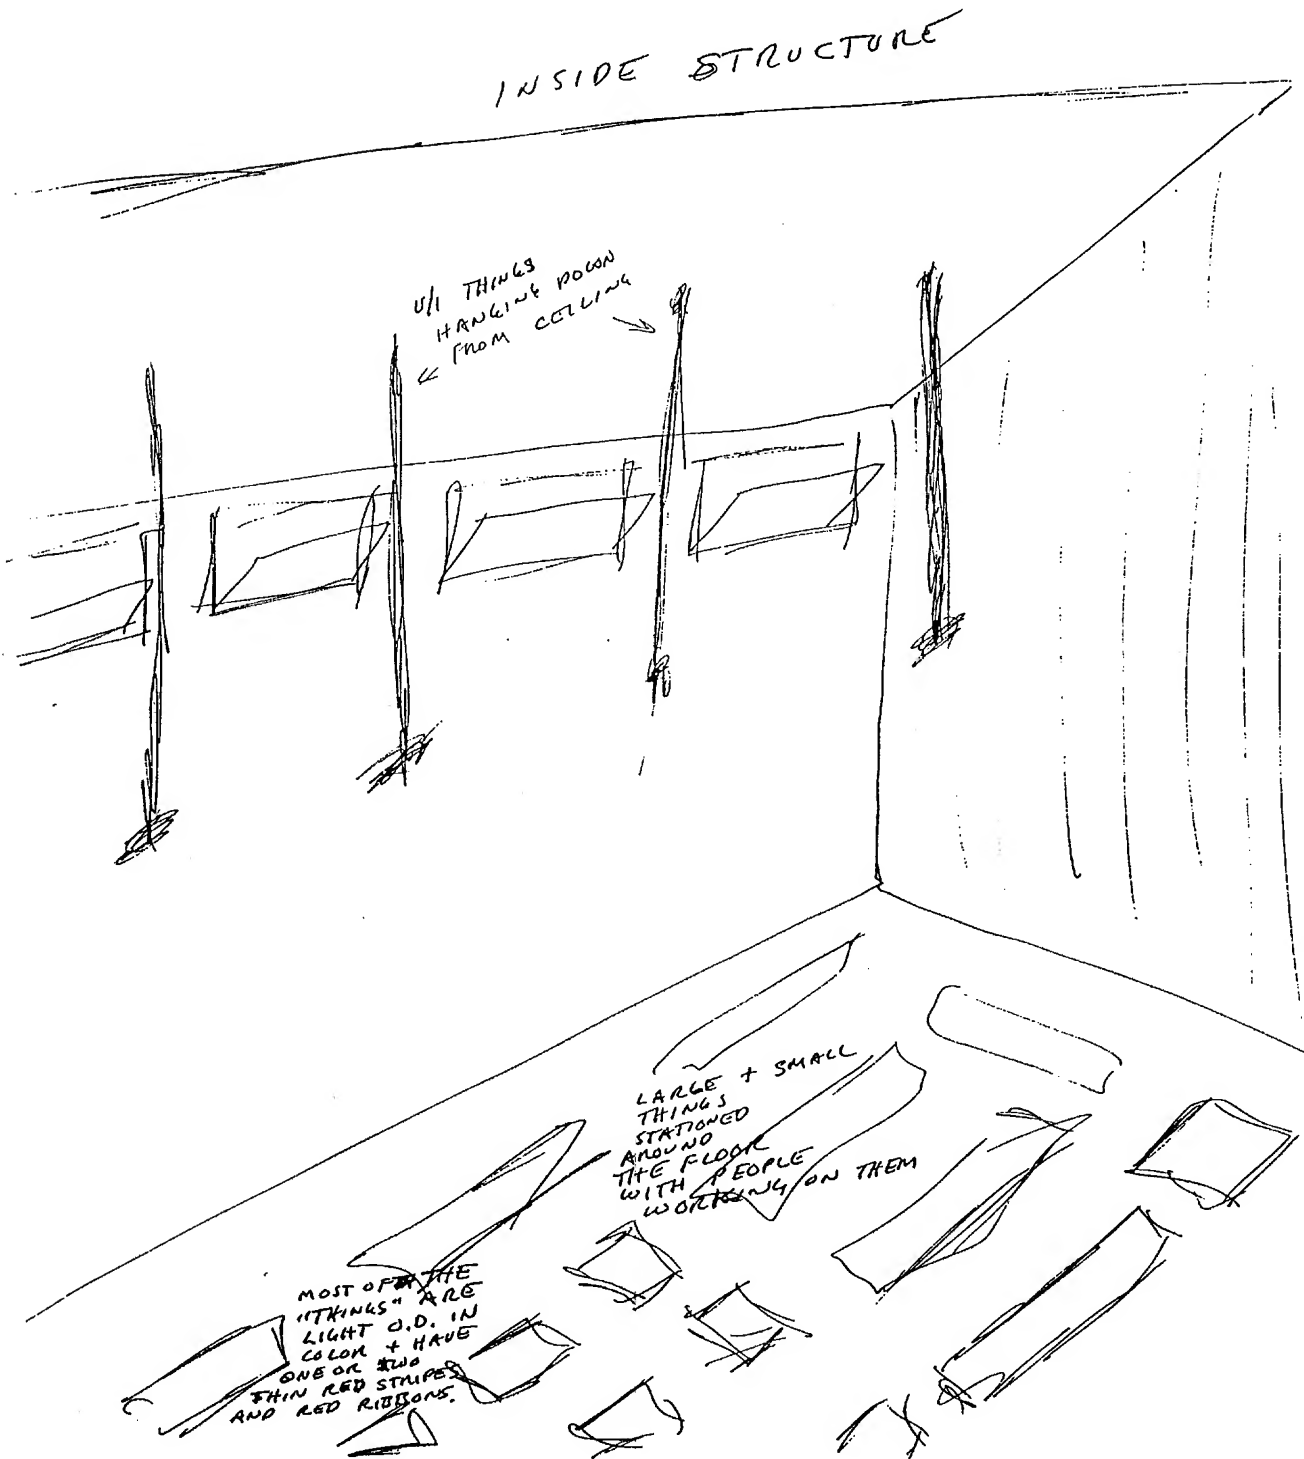

2. NATURE OF ACTIVITY:

- a. "Work" appears to be assembly of some sort.
- b. I noticed that most of the workers were women.
 - 1) The women were in various styles of dress, but most of the styles were very loose fitting and gave the impression of being rather old-fashioned. Some of the women wore head coverings which matched their clothes.
 - 2) They worked very slowly and deliberately. There was no sense of rushing or "time crunch".
 - 3) One of the women was standing beside a large round object (approximately 2' in diameter), using tools to "screw" a large front piece onto it.

- 4) Another woman was rubbing back and forth on one of the large objects, as a person would when using a whole sheet of sandpaper or an entire towel (see Sketch 2).

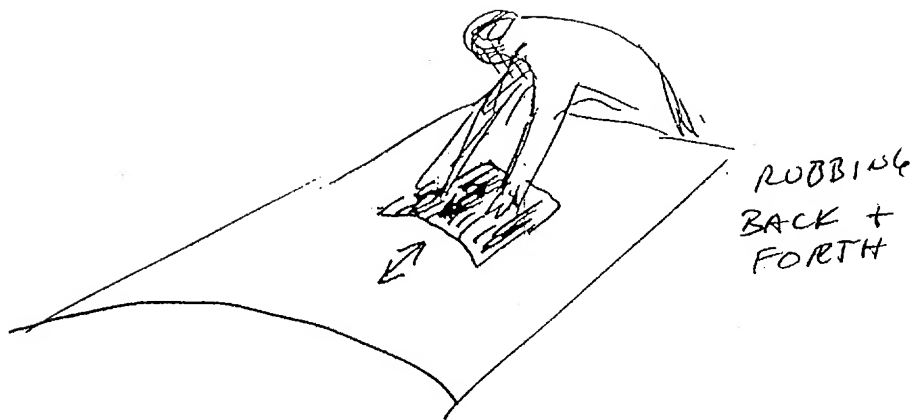

3. PURPOSE OF ACTIVITY: I could not get any other impression of purpose except for assembly of the objects which were positioned around the floor of the large room.

- a. The objects were of various types and sizes. Some appeared to be as large as trucks. One appeared to be as large as a helicopter. Most were approximately 2' in diameter and +/- 10-20 feet in length.
- b. Almost all of these objects were a light olive drab (o.d.) in color, and most had one or two red stripes around them. Several had short red ribbons dangling from various places.

SKETCH 1

The target structure was very large inside, almost like a gymnasium or warehouse. It was well ventilated with outside air from windows which were positioned high on side walls. The end walls appeared to have no windows, and appeared to be made of wood. There are unidentified "things" hanging from the ceiling. These remind me of ceiling fans, or of electrical cords hanging down. Both large and small objects are positioned around the floor of this large area for being worked on.

SKETCH 2

One of the women was rubbing back and forth on one of the large objects, as a person would when using a whole sheet of sandpaper or an entire towel.
